

Nejood Bin Eshaq

AI Engineer

Phone: +966 58 296 8140 Email: njoodeshaq@gmail.com Location: Saudi Arabia LinkedIn: [linkedin.com/in/njoud-abdulaziz-26a47b208/](https://www.linkedin.com/in/njoud-abdulaziz-26a47b208/) GitHub: github.com/njoudae

SUMMARY

AI Engineer and Researcher focused on designing and building intelligent systems and automation-driven solutions, and leading AI-driven digital transformation initiatives. Experienced in developing scalable AI applications, transforming complex workflows into efficient automated processes, and delivering scalable, data- and technology-driven solutions for real-world challenges. Interested in research in Machine Learning, Natural Language Processing, and Large Language Models (LLMs).

EXPERIENCE

AI & Automation Engineer

April 2026 – Present

Freelance

- Collaborated with clients to analyze requirements, translate business needs into technical solutions, and design end-to-end AI and automation systems.
- Engineered intelligent systems and automation solutions using AI, including predictive models, web scraping pipelines, and LLM-based agents for real-world applications.
- Developed scalable data pipelines and automated workflows, enabling efficient data processing, insight generation, and decision support.

Artificial Intelligence Engineer

Sep 2025 – Mar 2026

Deanship of Electronic Services, King Khalid University

- Built and deployed predictive models for solar power forecasting using real-world datasets.
- Designed data pipelines, web scraping systems, and Agentic AI workflows integrating LLMs.
- Delivered training programs on researches & digital transformation.

Trainer (GAT Preparation)

Jun 2023 – Jun 2024

Shaguf Platform

- Delivered structured training sessions for graduate aptitude test preparation.
- Achieved 100% participant satisfaction with consistent high-performance outcomes (85+ scores).

Administrative Assistant

Oct 2023 – Jun 2024

Public Secondary School

- Managed educational systems, official correspondence, and administrative operations.
- Improved workflow efficiency through digital tools and structured data handling.

EDUCATION

M.S. in Computer Science (Artificial Intelligence)

2024 – 2026

King Khalid University

Thesis: Sarcasm Detection in Arabic Texts

B.S. in Computer Science

2019 – 2023

King Khalid University

GPA: 4.95 / 5.00

TECHNICAL SKILLS

- **AI Systems & Automation:** Intelligent System Design, Workflow Automation, Agentic AI, RAG Systems, End-to-End AI Pipelines
- **Machine Learning & AI:** Machine Learning, Deep Learning, NLP, LLMs, Representation Learning
- **Data Engineering & Processing:** Data Pipelines, Web Scraping, Data Cleaning, Feature Engineering, Power BI
- **Programming:** Python, SQL

- **Tools & Deployment:** LangChain, LangGraph, Django , FastAPI, n8n, Power Automate, Git, APIs Integration, Docker, Codex, Azure.
- **Research & Evaluation:** Experimental Design, Model Evaluation, Performance Optimization, Academic Writing

PROJECTS

- **AI Purchasing Agent** Built an intelligent procurement automation system that handles the full purchasing lifecycle, from email-based request intake to vendor selection and approval. Leveraged AI for structured data extraction and implemented automated workflows for RFQ distribution, quotation comparison, and decision-making. Integrated spreadsheet-based tracking, audit logging, and dynamic weekly reporting, significantly reducing manual processing and improving operational efficiency.
- **Review Analysis** Autonomous system for scraping, analyzing, and generating insights from Google Maps reviews using LLMs.
- **Musir (1st Place – Aseer Hackathon)** AI-based automated document verification system for truck drivers, leveraging computer vision and OCR. Developed and deployed as a mobile application to streamline identity validation and reduce manual verification processes.
- **Lawyer AI Assistant (RAG-based Legal Chatbot) - HR Hackathon** Built a RAG-based legal assistant over structured Saudi law data, enabling legal Q&A, contract analysis, and context-aware reasoning via a web chat interface.

CERTIFICATIONS

- Certified Analytics Professional (CAP) – (Training program 60 hours)
- AI Foundations Associate (Professional certificate)
- Generative AI (Professional certificate)
- PCEP (Certified in Python Programming) (Professional certificate)
- International English Language Testing System (IELTS) (6.0 Score)
- Machine Learning Specialization – Stanford University
- Deep Learning Specialization – Deep.Learning.AI
- Fundamentals of Deep Learning – NVIDIA
- SQL for Data Analysis – Udacity

PUBLICATIONS

- MindLLM at AraHealthQA 2025: Leveraging LLMs for Arabic Mental Health QA (ACL Workshop)

VOLUNTEERING & LEADERSHIP

- **IT Helper (KKU)** Provided technical support and troubleshooting assistance
- **Excel Bootcamp Supervisor (MASAR)** Led and organized an Excel training bootcamp
- **Member of Scientific administrative (Ulom)** Responsible for overseeing the workshop offered to students, as well as grading and providing feedback on their assignments.

LANGUAGES

- Arabic (Native)
- English (Professional)
